

Meglio, Innovative Television from Digital Specialists – Grundig!

Grundig today announces the arrival of its exciting new High Definition LED LCD TV, the MEGLIO. The inspired new range, starting the 22" LED LCD, has a unique combination of Australian and European design. The advanced features and imaginative touches have been developed in Australia especially for the local market. The Meglio has the ultimate style and digital technology that epitomises Grundig and continues to build upon the great quality of products released this year (Trio Touch and Replay).

The Meglio brings back the integrated multi-format DVD Player, but still keeps the side-lit LED slim form factor, for an ultra slim European cabinet. Continuing with great integrated features, the Meglio includes a wealth of easy to use specifications such as; integrated Full HD Digital Tuner, USB Multi-media Player & Play/Pause, Time Shift and Record Live TV (via an external USB or Hard Disk Drive). Providing the essential TV convenience – watch what you want when you want. Plus keep your home entertainment unit minimal without useless bulky accessories.

“The Meglio concept and development is something we are extremely proud of & the Australian design input makes this small screen TV unique and a stand out product for the market this year” says Brian Rodgers, Bush Australia Sales Director.

“The Meglio continues to be feature packed, like many of the new Grundig products. It’s exciting to be developing and producing such fantastic products that are really going to delight users; whether it’s with the easy to use functionality or the chic design aesthetic” says Rodgers.

The Meglio also features super cool front panel Touch Control. Turn the unit on, turn the volume up or change the channel with immediate touch response. Plus you can change the monitor direction any way you like with the awesome swivel stand. With great touches like these you would be forgiven for thinking this product would be expensive but at just \$499 RRP it is extremely good value for money. Plus the LED LCD technology makes the unit extremely reliable and environmentally sustainable with a six star energy rating.

Grundig Meglio Full HD LED LCD TV (GLED2211HDV) - RRP \$499.
