

Digital Specialists - Grundig Launches Vanto+ with Play, Pause, Rewind and Record Live TV!

Grundig today announces the arrival of the Vanto+ LED LCD TV, just in time for the first Full HD Commonwealth Games. The 24" Vanto+ LED LCD TV builds upon the amazing technical specifications of the already released Vanto Series, providing users with spectacular coverage of the 2010 Commonwealth Games.

The Vanto+ introduces a new, impressive feature to the Vanto Series - the incredible Play, Pause and Rewind (time-shift) Live TV function via USB Input (USB not included). This gives users the freedom to watch what they want when they want. The USB Record Function means all your favourite programs can be recorded at a touch of a button, so you never have to miss an event or your favourite shows again and no more messy/bulky PVR connections.

"The Vanto+ is the perfect TV to enjoy all the upcoming Commonwealth Games actions. You can watch and record all the Australian finals or replay historic record breaking action" says Brian Rodgers, Bush Australia Sales Director.

"It is exciting that this will be the first Commonwealth Games in Full HD and with the superior LED LCD Technology of the Vanto+ will allow users feel like they are actually in New Delhi watching all the action Live" says Rodgers.

The Vanto + continues to utilise the best edge-lit LED LCD technology - making the TV extremely reliable with a longer life span and super chic with the slim 35mm design. The design aesthetics are a key focus for the Vanto series and are being launched in elegant black cabinet but soon to be release will be the white Vanto+ for those look for a bright alternative. It is also more sustainable and energy efficient with a six star energy rating.
